

UVI HEALTH

Epione

Shiatsu massage pillow

Important Safety Instructions

When using UVI Epione make sure to follow all the instructions and necessary precautions listed in this user manual. UVI Epione is unlikely to help with chronic pain, but it can have some therapeutic effects when used correctly. However, used in excess or inappropriately, it can cause injury. UVI Epione should be used in moderation and should not be used for excessive periods of time.

Please read all safety instructions and warnings before using the product for the first time!

Do not operate UVI Epione under a blanket or a pillow. Allow the heat to dissipate otherwise the product can overheat, which can lead to injury, electric shock, or fire.

Do not use in environments with high temperatures or humidity since it could lead to electric shock or fire. If the product overheats, let it cool down for 30 minutes.

UVI Epione should not be used by children or people with chronic illnesses, reduced physical, sensory or mental capabilities. Pregnant women should consult a doctor.

When the product is not in use, please switch the power off. Do not leave the product unattended when plugged in and never use the product while sleeping or napping.

Standard EU
electric charger

Product Operation Guide

1. Plug the adapter into the power and press the “Power Button” to activate the device.
2. Press the “Power Button” again to turn on the heat function. When the heat function is turned on, you can see massage nodes light up red.
3. UVI Epione automatically changes massage direction every 60 seconds.
4. The product will automatically turn off after 20 minutes. If you want to turn it off manually, press and hold the “Power Button”.

Tips and Warnings

1. When using the product for the first time limit the use to 5 minutes or less, to allow your body to adjust to the experience.
2. UVI Epione will switch off automatically after 20 minutes. Please wait for at least 15 minutes before using it again. Excessive use could lead to overheating or shortened lifespan of the product as well as injuries.
3. To soften the massage pressure, place a dry towel between yourself and the product.
4. Do not use the product if you have a swollen or inflamed area, a skin disorder, or an open wound.
5. UVI Epione is not intended for medical use, nor shall it be used as a replacement for medical attention. The sole intended purpose of the product is to provide massage.

Cleaning and storage

Store UVI Epione in a dry, dust-free location with with temperature between 15 do 30° and 30 - 70% relativ humidity. Ensure that the product is not exposed to direct sunlight.

Before cleaning, make sure that UVI Epione has been turned off and that the adapter is plugged out from the outlet. Use a dry cloth to clean PU leather.

To prevent damage and discoloration , do not clean UVI Epione with corrosive detergent. Do not wash it in the washing machine and keep it away from the water.

Do not apply excessive pressure to massage heads. If excessive force over 50 kilograms is applied directly it may damage the product and invalidate the warranty.

If you encounter any problems, do not hesitate to contact us via our email info@uvihealth.com for help. More information and tips on how to use UVI Epione to its fullest can be found at our website www.UVIHealth.com.
