UVI Desk sit-stand adjustable desks

Standing at work has been clinically proven to help improve health, reduce the chance of disease and increase physical activity. The time you spend standing is more effective in reducing the risks associated with sitting than an hour of physical exercise. By switching between sitting and standing positions during the day you can drastically reduce back and lower back pain.

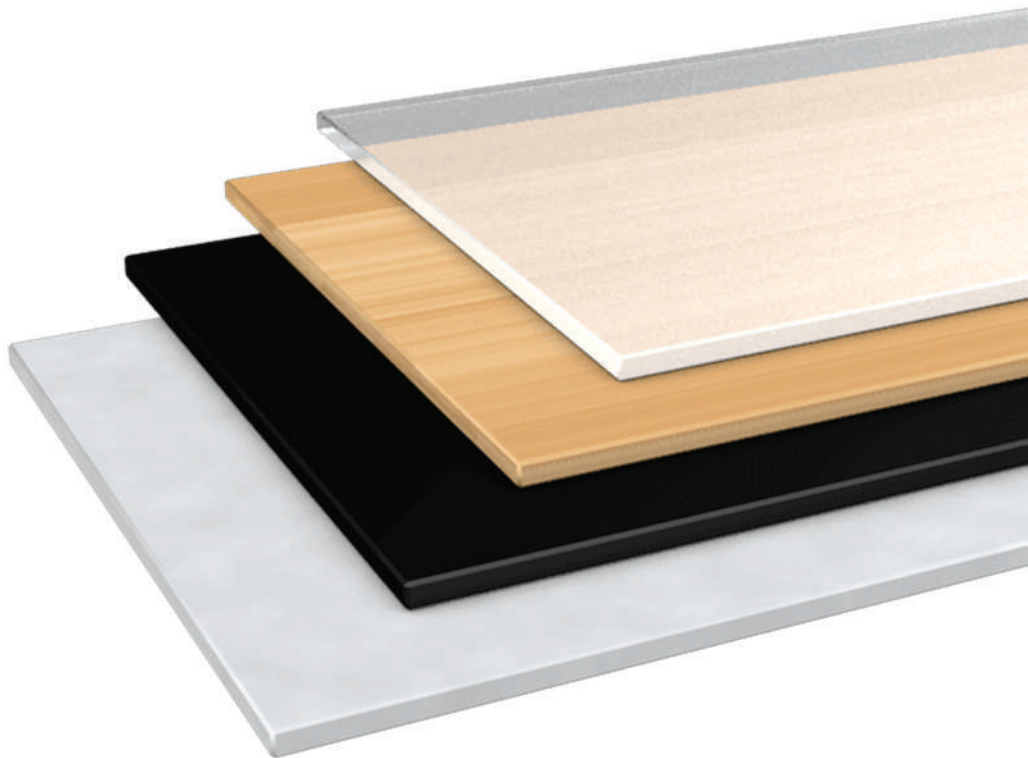

The use of a sit-stand desk should not become a choir for the user, so the best solution is an electric desk, that allows height adjustment with one click. As we all know - if something is simple, reliable, and easy to use, we are more likely to use it.

50+

different colors
of desktops to
choose from

4

different types
of frames

All our desktops are made from two pieces of chipboard (each 19 mm thick) and coated with a color pattern of your choice. The standard thickness is 38 mm, which ensures high load capacity. If you are ordering a desktop for a corner table you can choose between 90° or oval corner.

If the desktop color you are looking for is not in the catalog please contact us at info@uvidesk.com and we will make sure to figure something out!

Choose the right desktop dimensions

Our desks are of high quality, so you can be 100% sure that they will be your partner either in your office or apartment for a long time. It is certainly wise to measure everything twice and order a table, that will match with the rest of the space, both in terms of size and style! Our desk frames have a wide range of flexibilities that will adjust to all of your needs.

Different UVI Desk frames offer different lengths of table tops and different maximum load capacities:

- **Standard frame:**
110 to 200 centimeter table top width and max load up to 100 kg
- **Standard frame LITE:**
110 to 200 centimeter table top width and max load up to 80 kg
- **Corner frame:**
110 to 200 centimeter table top width in both sides and up to 120 kg max load
- **Double frame:**
2x 110 to 200 centimeter table top width and max load up to 120 kg

Different Imitations of Oak

Our line of oak imitation colors come in 15 different shades that will surely impress you. The material gives a feeling of roughness to the touch and look, which gives up a realistic feeling and appearance of real oak. There is a wide variety of shades, going from lighter to darker, so we are sure that you will find a table top color, that will perfectly fit into any business or home environment.
